

VINYL LETTERING - INSTALLATION INSTRUCTIONS

Surface Preparation: Clean the surface where you intend to install the lettering to remove any dirt, grit or oils which may prevent the lettering from adhering properly and permanently.

Equipment Needed: Masking tape, scissors, tape measure or T-square, squeegee (supplied)

1

Using center line, center the text from side to side on installation surface.

Use several 2" strips of masking tape across the top to hold in place temporarily

2

Position text vertically on surface using the baseline indicated below letters.

Measure from baseline to bottom of installation surface.

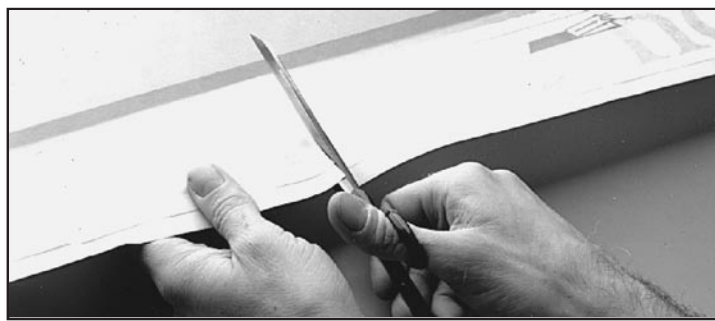

Application paper will have Center and Base lines marked.

Mounting Instructions

3

Form a "hinge" by applying tape along entire top edge of text/application paper

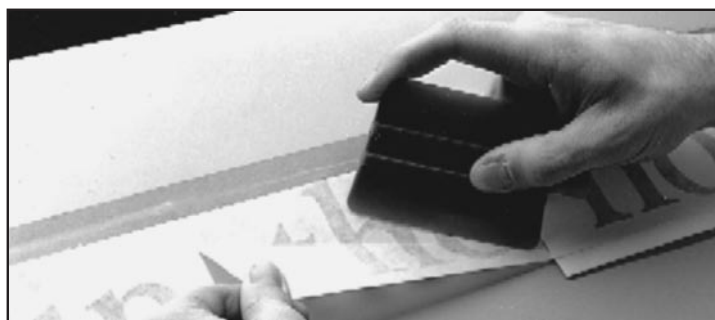

4

Using scissors, cut into vertical sections 6" to 8" wide, so that each section is independently hinged from the top.

5

Take one section at a time and bend it back over tape "hinge." Next, peel off the release backing.

6

Using firm pressure, begin at top center and squeegee down and outward over the entire section. Wipe with wet cloth/towel.

7

Remove masking carefully at an angle; make sure all letters remain in place. Follow steps 5-7 for each remaining section.

8

Please store your Squeegee in a safe location for the future

Thank you for your business!
